

Issued - 24 June 2011

Easy Fix Concrete

Simple kit used during installation into existing concrete floors of our most popular linear shower channels. Comprises a large waterproof gasket that fits over the waste outlet, and back filling material to make up the floor to the correct level. **E&OE**

PRODUCT CHARACTERISTICS

- Installation kit for floor drains being fitted into concrete floors
- Includes key components for sealing drain into floor & matching to waterproofing membranes
- Large gasket membrane fits over Multi Trap body to create total seal
- Sealing slurry used to seal and fix gasket to floor
- Suits all common TILE & Adhesive types

APPLICATIONS

- All bathroom installations where floor drains are installed into existing or new concrete floors
- Gasket fits below channel drain, to create waterproof barrier preventing water seepage or leaks from causing damage to concrete substrates.
- Especially designed & useful for REFURBISHMENT projects when fitting floor drains into EXISTING concrete floors.

TECHNICAL DATA

- Gasket : rectangular fleecy gasket c/w integrated trap surrounding seal
- Sizes : One size suits all round traps for channel to 1200mm long
- Components : Gasket, waterproofing slurry, squeegee

INSTALLATION INSTRUCTIONS

- Comes with each Tube

PACKAGING

- Kit : Paper over board tube with end caps

DISPOSAL

- Packaging should be disposed of according to local bylaws.

INSTALLATION INSTRUCTIONS

- Suitable for use with common waterproof sealing membranes such as PCI Lastogum , AquaeSEAL, AquaeGUARD etc.
- For use with all common cementitious (powder) tile adhesives
