### Push Control Button, TECE/loop Glass

Engineered in Germany, a premium range of 'glass finished flush plates' for concealed cisterns & sanitaryware installation frames by TECE. Contemporary 'Flat' or optional 'Flush' design combines with high quality materials to create a classical yet simple solution to discretely actuate the controls of concealed cisterns. Supplied with all fittings & instructions. E&OE

### APPLICATIONS

TECE/loop Glass are matched exclusively to the TECE range of concealed cisterns & installation systems suitable for WC's in en-suites, cloakrooms & other bathroom projects. The push control plate is fitted to cisterns that are suitable for :

- All common construction systems, in domestic, commercial, & institutional new build or refurbishment projects
- Small or large bathrooms, where space is at a premium, while ease of cleaning & sleek design is a priority
- Premium design led bathroom installations, where aesthetic considerations require sleek product solutions

### PRODUCT CHARACTERISTICS & KEY FEATURES

- The TECEloop Glass range of dual flush, contemporary flush plates is available in a choice of 11x designs with a mixture of finishes including:
 

○ Black Glass Surround	○ Push Buttons, Gold
○ White Glass Surround	○ Push Buttons, White
○ Green Glass Surround	○ Push Buttons, Black
○ Push Buttons, Polished Chrome	○ Push Buttons, Matt Chrome
- Slimline 'flat' push button plate fits 11mm proud of surface it is fixed to, and operates all models of TECE concealed cisterns & frames for WC's
- A completely smooth 'Flush' finish option uses additional installation frame recessed into wall\*
- Push control button also acts as removable decorative access cover to effect instant access to complete Control & Service Assembly, including unique transparent splash guard
- Smooth actuation of cistern controls with spring loaded buttons that return to their original position
- Compatible with optional 'Insert Chute' for use with cleaning tablets
- Supplied with control push rods to actuate flush valve components within cistern

\* Optional Extra, See separate Datasheet. Requires a minimum wall thickness of 30mm, to result in an ultra discrete plate 'flush' with the surface.

Issued - 15 June 2015
